

THEORY OF STAR FORMATION: TABLE OF CONTENTS

C.F. McKee & E.C. Ostriker, ARAA, 45, 565-687 (2007)

Abstract	565
1. INTRODUCTION	566
2. BASIC PHYSICAL PROCESSES	
2.1 Turbulence	567
2.1.1 Spatial correlations of velocity and magnetic fields	567
2.1.2 Turbulent dissipation timescales	571
2.1.3 Physical scales in turbulent flows	572
2.1.4 Density structure imposed by turbulence	574
2.1.5 Observations of turbulence	576
2.2 Self-Gravity	579
2.3 Magnetic Fields	584
2.3.1 Ionization	588
3. MACROPHYSICS OF STAR FORMATION	
3.1 Physical State of Giant Molecular Clouds, Clumps and Cores	589
3.1.1 Dynamics of giant molecular clouds	591
3.1.2 Clumps and cores	595
3.2 Formation, Evolution and Destruction of GMCs	600
3.2.1 Cloud formation	600
3.2.2 Cloud evolution and destruction	606
3.3 Core Mass Functions and the Initial Mass Function	611
3.3.1 Observations of the stellar initial mass function and the core mass function	611
3.3.2 Theoretical proposals and numerical results	614
3.4 The Large-Scale Rate of Star Formation	618
4. MICROPHYSICS OF STAR FORMATION	
4.1 Low-Mass Star Formation	624
4.1.1 Theory of core collapse and protostellar infall.....	624
4.1.1.1 <i>Effects of rotation</i>	627
4.1.1.2 <i>Effects of magnetic fields</i>	628
4.1.2 Bondi-Hoyle Accretion	632
4.1.3 Observations of low-mass star formation	633
4.1.3.1 <i>Brown dwarfs</i>	637
4.1.3.2 <i>Binaries</i>	638

4.2 Disks and Winds	639
4.2.1 Observations of disks	639
4.2.2 Accretion mechanisms	642
4.2.2.1 <i>Hydrodynamic mechanisms</i>	643
4.2.2.2 <i>MHD mechanisms</i>	645
4.2.2.3 <i>Self-gravitational mechanisms</i>	646
4.2.3 Disk clearing	647
4.2.4 Observations of young stellar object jets and outflows	648
4.2.5 Driving magnetohydrodynamic winds and jets	651
4.2.6 Origins and effects of outflows	653
4.3 High-Mass Star Formation	654
4.3.1 Protostellar infall	654
4.3.2 Observations of high-mass protostars	658
4.3.3 Forming stars in the presence of radiation pressure	659
4.3.4 Photoionization feedback: HII regions	660
4.3.5 Star formation in clusters	661
 5. OVERVIEW OF THE STAR-FORMATION PROCESS	 664
